

RETRACTABLE SHELVING SYSTEM

UPRIGHTS

Slotted on both sides in increments of 50 mm to take top and bottom shelves as well as retractable shelves. The uprights are constructed with welded horizontal and diagonal bracing supports. The foot plate is fitted to secure the shelving system to the floor. Made from high quality sheet steel.

SINGLE DRAWER OPENING SYSTEM

The single drawer opening system forms a standard part of this shelving system. The system prevents the operator from retracting more than one shelf at any one time. The system comprises a locking bar of the same height as the upright and one locking catch per retractable shelf. Each bay requires one locking bar and one safety catch per retractable shelf.
