

P.C.B. HANDLING FRAME SYSTEM (MEGAPRINT® - MINIPRINT®)

The use of Megaprint® adds 44 mm the container height overall.

An example of using a Megaprint® in conjunction with a Miniprint® system for P.C.B.'s which are especially long, is shown by using both systems for additional support.

DIVIDERS FOR 600x400

The Megaprint® and Miniprint® systems can be sub-divided in a logical and precise manner using a series of sub-dividers with a special characteristics. These allow the complete and flexible utilization of the system, because any P.C.B., which is smaller than the container itself can be accommodated. The dividers are available with three variants which allow a minimum pitch between sub-dividers of 1.7 mm. The three variants are normal, minus and plus distance. The construction of the dividers is robust and reinforced in profile with aluminium ribs. In each case the specification and variants of each is clearly marked.
