

CARD CARRYING FRAMES

EXAMPLE OF CARD CARRYING FRAME SYSTEMS

F PV 9110 01 00, F PV 9140 01 00, F PV 9120 01 00 and F PV 9160 01 00

All card guides have as standard a re-inforcing aluminium rail for extra rigidity. The slot profile in the card guides is 2.5 mm wide and 3.0 mm deep on a 15.3 mm pitch. Each card guide also has a moulded in slot numbering system, to ensure correct location of cards, and an integral base stop. A special double sided centre card guide is available on the 190 mm high version. This gives greater utilisation and cost saving and a standard system is available incorporating this addition. All components can be purchased separately and the aluminium rails can be supplied in lengths up to 1.5 m to provide flexibility in designing a system to suit your manufacturing requirements.

F PV 9120 02 00 and F PV 9160 02 00

This system provides the same low cost solutions as the models F PV 9110 01 00, F PV 9140 01 00, F PV 9120 01 00 and F PV 9160 01 00 but has the double-sided centre card guide incorporated. Since the centre panel (Art. F PV 6852 00 07) is double-sided, it allows for extra capacity without the loss of space associated with other systems which need to use two single card guides to achieve the same result. Standard Conductive Containers for storage of these card carriers are available in varying depths to suit different models of carrier.
